Business Profile

About Us

Since our inception in 2017 it has been our mission as a business is to provide, diversified and comprehensive Rope Access services to all our customers. We are a Level III consultancy service, owned, managed and operated by Specialized Rope Access qualified personnel.

We offer a cost -effective alternative to conventional scaffolding or cradle systems. This offers our clients a faster and flexible solution in order to minimize risk and operating costs. Our services are based on tailoring our solutions for our customers while keeping the cost constrained to a minimum, we aim for high level service, with potentially sub industry cost.

Vision

We strive to achieve integrity in our work in order to monitor and report on our client's assets efficiently, safely and sustainably. We aim to keep abreast of Rope Access legislation thus assuring our clients of our best intentions and service delivery at all times.

Through our commitment to achieving our mission, and the innovative and entrepreneurial spirit of our employees, our business has grown from servicing the Commercial/ Industrial and Power Generation and general industry, into a widely diversified operation, offering an extensive range of Rope Access services.

Collectively, Africa Rope Access's trading divisions serve all industries both local and international. We understand that each client's needs are different; therefore, our business system and processes have been designed to accommodate a high level of flexibility.

Our operating structure previously encompassed of one office servicing South African clients. During the latter part of the reporting period, we restructured our business into our two focus areas comprising on Southern Africa/ Africa and now anywhere abroad.

We believe this structure is core to the sustainable growth of the organization as it will facilitate further diversification of our range of services, and expansion into new markets.
